

# VIDEO EXPOSES STUPID ROAD BEHAVIOUR

By Kevin Glancy

The following clip, courtesy of youtube, highlights drivers misbehaving internationally and speed is a cause of the subsequent accidents along with driver inattention and absolute stupidity: It is a must watch.

But it also reveals that if you could educate drivers and motivate them to be more attentive there might be some progress made and lives could be saved. – in all the instances highlighted in the video clip, speed cameras would not have stopped the resulting road trauma because quite simply there will always be drivers who will ignore the basic rules and commonsense that should be applied on the roads and in this video there are multiple examples.
